

## Corporate Services Accounts Technician

Whitings LLP, Bury St Edmunds

Due to the growth of our team, we are looking for an Accounts Technician to join us in an exciting and varied role.

### A bit about the role:

Working in the corporate & audit team, your focus will be small and medium sized companies, working on accounts preparation, tax computations and audit fieldwork. You will often be attending clients premises, working remotely and understanding the business from the inside. You will be comfortable working as part of a team and enjoy problem solving. As a part of your role you will be assisting senior members of staff and you will take ownership of work assigned to you. You will understand your contribution to the team goals and take pride and responsibility for your work.

We work with our colleagues in tax and general practice too and with other offices around the firm.

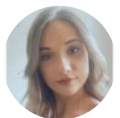

### A bit about us:

We are a small group who really enjoy our team dynamic. We all work together, usually split into two teams at a time, working on separate assignments before moving on to the next. We have great study support, in fact most of the team studied and qualified with the firm. But the support goes further than the classroom - everyone is used to working together and solving problems as a team. Many of us are also on development plans in order to progress and develop to the next level, and we will encourage you to do the same if that's your goal.

We have a great social atmosphere, and along with the general practice and tax teams, we have many events we hold each year to bring us all together. The office is open plan and modern, allowing us all to socialise and collaborate.

We work really closely with our clients and have great relationships with them. We do not simply audit - we provide a range of services to many clients. As the corporate department, we assist with any corporate matters, which can include special assignments such as group reorganisations, consolidations, management accounts - it is a varied and exciting team to be a part of - no two days are the same.

We encourage our team to take on specialisms, for example charities, solicitors accounts rules, pension schemes, corporate tax or corporate finance. We will write blogs and circulate updates on these subjects around the team. It enables us to have a technical focus which many of us enjoy.

### A bit about you:

The ideal member of our team would have:

The partners & managers you will be working with

- AAT Level 4 (or part qualified AAT with experience, we will consider those currently in a training contract)
- A good working knowledge of double entry, and comfortable with posting journal entries
- Great communication skills and desire to work in a team
- A willingness to develop and learn, to push themselves to do and achieve new things
- Comfortable communicating with clients when visiting businesses
